# WHAT PEOPLE SAY

“Stephen sets a flag in the sand, a mark if you like, for how we achieve great things, not so much by being great but rather creating the conditions for greatness to emerge. The new role for the human factor is perhaps the oldest of all –to mobilise people in pursuit of a better future.” *Matt Church, Chairman and Founder – Thought Leaders*

“Stephen combines a collision of contemporary thinking and ancient wisdom in a practical narrative with confronting tools to support your journey to evolve your leadership and organisation.” *Will Noble, Client Service Director–Fujitsu New Zealand*

In a world where organisations are paralysed by complexity and cultures of fear, Stephen offers a roadmap for collaboration and most importantly purpose-driven communities. *Simon Talbot, former CEO National Farmers Federation*
